

KBE 76

Discovering new potential

KBE 76 *Double seal system*

Window and door system

KBE 76 Double seal system

KBE 76 is a range of state-of-the-art windows and doors with unique performance features: top quality, high energy and heating cost savings, excellent sound insulation and reliable intruder protection. They also come in a range of design options that leave nothing to be desired.

Optimum quality

KBE 76 offers design and function, statics and insulation values, environmental friendliness and outstanding quality. This advanced system delivers optimum values and is a sound future investment.

Innovative technologies

Despite having narrow profile surfaces to enable large windows, KBE 76 is intelligently designed for triple glazing with modern insulating glass.

KBE 76 window with 76 mm construction depth

» Top heat insulation

High cost and energy savings with a U_f value of 1.1 W/(m²K).

» Top sound insulation

Optimum sound insulation in combination with high quality sound insulation glazing.

» Top intruder protection

Special security fittings, plus additional anti-burglary features are optional.

» Top care properties

The high quality surfaces are weather resistant and easy to clean.

» Top value for money

High quality means durability, which increases your property's value in the long term.

» Top appearance

Narrow profiles are perfect for new buildings and renovation projects.
